Recommendations

For a more comprehensive analysis, the dataset should include the following additional columns:

1. Trip Fare: The fare for each trip to analyze cost efficiency.

2. Trip Duration: Duration of each trip to study time efficiency.

3. Driver Rating: Driver ratings to correlate trip purpose and customer satisfaction.

By including these data points, more insightful analysis can be conducted, leading to better business decisions.

Conclusion

This analysis highlights key insights into Uber trip purposes, mileage trends, and trip lengths. Incorporating

the recommended data points will further enhance the understanding and efficiency of Uber trips, providing valuable

information for strategic business decisions.
